

Lazar Jovičić

QA Manual & Automation Engineer

✉ lazarjoviciclj96@gmail.com | ☎ +381 691406093 | 📍 Novi Sad, Serbia | in linkedin.com/in/lazarjovicic96

PROFESSIONAL SUMMARY

Results-driven QA Manual & Automation Engineer with nearly 5 years of experience delivering quality across web and mobile applications in Agile environments. Proficient in Playwright (.NET/TS/JS), STLC/SDLC lifecycle management, and AI-augmented testing workflows - reducing manual effort by ~40% through intelligent automation. ISTQB Foundation Level certified, currently pursuing ISTQB CT-GenAI. Skilled at bridging communication between technical teams and non-technical stakeholders, with a continuous-improvement mindset and a proven track record of on-time, high-quality releases.

CORE COMPETENCIES

▶ Manual & Exploratory Testing	▶ Playwright Automation (.NET/TS/JS)
▶ STLC / SDLC Lifecycle Management	▶ CI/CD Integration & DevOps Practices
▶ API Testing (Postman, Swagger)	▶ SQL & Database Validation
▶ Defect Management & Root Cause Analysis	▶ AI-Augmented Test Generation
▶ Agile / Scrum Methodology	▶ Stakeholder Reporting & Communication

TECHNICAL SKILLS

Languages: Core Java, Core C# (.NET), SQL

Automation: Playwright (.NET/TS/JS), Selenium WebDriver, TestNG, xUnit, NUnit

AI Testing Tools: GitHub Copilot, Claude, ChatGPT - test & document generation, script drafting, defect summarization

API & Performance: Postman, Swagger, JMeter

Test Management: Jira, X-Ray, Azure DevOps

Version Control & Collaboration: Git, Slack, Microsoft Teams, Zoom

WORK EXPERIENCE

QA Manual & Automation Engineer · INSSIO Solutions | Mar 2025 - Present · Remote

- End-to-end manual (ATDD) and Playwright .NET automated testing for a production web platform, with zero critical regression escapes across 3 major releases.
- Leveraged AI tools (Claude, GitHub Copilot) to accelerate Playwright script generation, reducing script authoring time by ~40% and freeing capacity for exploratory coverage.
- Drive STLC/SDLC test planning and execution in a fast-paced Agile team, delivering sprint-ready test cycles within tight release windows.
- Own defect lifecycle in Azure DevOps - from root cause analysis through resolution tracking - maintaining defect escape rate below 3%.
- Produce test progress, risk, and release readiness reports for technical and non-technical stakeholders, enabling data-driven go/no-go decisions.
- Established test documentation standards, contributing to a 25% reduction in onboarding time for new QA team members.

QA Manual & Automation Engineer · VRIZE | Dec 2022 - Feb 2025 · Remote

- Designed, maintained, and executed comprehensive manual and Selenium - Java automated test suites across enterprise applications, improving defect detection rate by 30%.
- Performed thorough end-to-end and regression testing aligned with business requirements and specifications in Agile sprints.
- Partnered with developers and product managers to define testing scope, acceptance criteria, and quality objectives from project inception.
- Led defect investigation and root cause analysis, contributing to a measurable reduction in recurring production issues.
- Tracked and reported all defects in Jira, maintaining 100% traceability between test cases and requirements.

Quality Assurance Tester · Growthmill | Nov 2021 - Dec 2022 · Remote

- Authored Gherkin-based test scenarios and test cases from acceptance criteria, establishing a BDD testing foundation for the QA function.
- Executed smoke and regression testing across sprint cycles, consistently identifying critical defects before deployment.
- Collaborated with developers in Jira for defect documentation, tracking, and resolution across multiple concurrent projects.
- Supported cross-project QA coverage, contributing to delivery of 8+ product releases with zero critical production incidents.

CERTIFICATIONS & LICENSES

Featured / In Progress

- ISTQB CT-GenAI - Testing with Generative AI (In Progress) - SEETB
- ISTQB Foundation Level - SEETB
- Get Started with AI-Assisted Development - Microsoft

Automation & Testing

- Playwright Automation Testing from Scratch with Framework - Udemy
- Software Testing Masterclass - Udemy
- POSTMAN: The Complete Guide - REST API Testing - Udemy
- Selenium WebDriver with Java - Udemy

Technical & Complementary

- PostgreSQL Essential Training / SQL for Testers - LinkedIn Learning
- IT Business Analysis - Vivify/Epam Academy
- HTML / CSS - Codedamn
- Git Going Fast: Git Crash Course - Udemy

EDUCATION

Technician of Mechatronics · Polytechnics - School for New Technologies, Belgrade

ADDITIONAL INFORMATION

Language proficiency: English - C1 (Advanced) | Serbian - Native
